

Scoring Guidelines

Scoring is based on the team's ability to effectively communicate issues identified during the assessment, maintain clear communication throughout the proposal process, and demonstrate professional conduct during the event.

Assessment Criteria

- Teams must provide **explicit descriptions** of how and when vulnerabilities were discovered and exploited.
- Each issue must include an **effective and executable mitigation plan** for the simulated organization.
- Any issue affecting ongoing business operations must be **promptly addressed** with the simulated organization or the Operations Team.

Point Deductions

- Points may be **deducted** for violations of the **Rules of Engagement** or **Scope of Work** agreements.
- Missing **deadlines for deliverables** will result in penalties.
- Actions that **interrupt or degrade** the competition environment are the full responsibility of the team and will negatively impact scoring.
- Modifying any competition or host institution system—whether intentional or accidental—may lead to **disqualification or penalties**.

Dispute Resolution

If a question arises regarding scoring or scoring procedures, the **Team Captain** must immediately contact competition officials to resolve the issue.

Incident Reporting

Teams are encouraged to **document and report potential issues** they may cause as soon as possible. Reports should be submitted to an Operations Team member as needed during the competition.

Each **incident report** must include:

- A detailed description of the event, including **source and destination IP addresses**, **timelines**, and **potential damage**.
- A clear discussion of **affected systems**.
- A **remediation plan** to correct the issue.

Timely, thorough, and accurate reports may reduce penalties for the event. No partial points will be awarded for incomplete, vague, or late reports.
